1998 COVERAGE LIST

The PsycINFO Coverage List includes journals and other serial publications that are scanned regularly, abstracted selectively, and included in *Psychological Abstracts* (PA), PsycLIT, ClinPSYC, and the PsycINFO database. In cases where a journal publishes articles only in a language other than English, the abstracts for these journal articles will be included in PsycLIT, ClinPSYC, and PsycINFO database, but will not appear in *Psychological Abstracts*. A dagger (†) after the title indicates this occurrence. For journals that publish articles both in English and in other languages, only the abstracts of the English language articles will be included in PA while both English and non-English language articles will appear in PsycLIT, ClinPSYC, and the PsycINFO database.

The presence of a serial title in the list does not imply that all articles contained in issues of that serial will subsequently appear in PsycINFO's databases or print products. Journals likely to publish articles relevant to behavior are included for regular systematic scan of their content. Articles are selected specifically and individually for their relevance to psychology.

Whenever possible, publisher name, address, frequency of publication, and ISSN are included for each publication to facilitate access to original documents by users. The date in parentheses indicates the publication year of the first issue scanned by PsycINFO of a particular serial. Asterisks within parentheses indicate that coverage began with the first issue of publication. An N/A after an ISSN indicates that the number was not available. Bold type identifies those journals that published articles appearing in this volume year.

This Annual Author Index contains over 100,000 references to the authors and editors of approximately 40,000 abstract records published in the 12 monthly issues of *Psychological Abstracts* from January 1998 through December 1998. A companion work, the Annual Subject Index, references these records by topic.

In this volume, all the authors and editors whose work was abstracted or cited in *Psychological Abstracts* for the periods indicated are listed alphabetically by surname. However, the Author Index is intended to be a name index only and not a person index. "Adams, P." will be listed separately from "Adams, Paul," even though the names may refer to the same person. Two listings for "Adams, P." may also refer to two different authors. Entries consist of author name(s), and the *Psychological Abstracts* abstract number under which the entry appeared.

Mommy Says It's Easy to Search PsycINFO From Home!

My mommy's a psychologist. She used to spend lots of time at the library looking stuff up on the computer. But then we got our own computer, and mommy found out that she could use it to get to the PsycINFO database, from this place called APA. Mommy still likes to go to the library sometimes, but she says being able to search from home gives her more time to spend with me.

So if your mommy or daddy needs to do psychological research, tell them to ask the people at the library if they can search from home, or call those nice people at APA who make the database. I'm sure they'll be able to help them, just like they helped my mommy!
